FOTOBLOC®

Our fotobloc's® are made of Foresto Color. The material comes from Portugal. This is an organically completely coloured wood fibre board made of FSC certified woods. The fotobloc's® are milled and then fitted with a ferrite magnet. A self-adhesive, white iron disc serves as a counterpart.

Fotobloc	Made in Austria
Material	wood fibreboard Made in Portugal
Colouring	Organic completely dyed through
Certifications	FSC® PEFC™ EN ISO 9001 CE EC conformity 1328-CPR-0062
Befestigung	Invisible fastening with magnets
Material strength	19mm 30mm
Weight	770kg/m ³
Size	85 x 85mm 85 x 135mm
Fire rating	D-s2,d0
Versions	Regular Bold Wide
Colours	Black WhiteGrey

Care instructions / irregularities for FOTOTBLOC®

Cleaning: Wipe with a lint-free cloth. Avoid rubbing and scouring the surface. Due to the use of organic dyes, in conjunction with the natural variations in the colour of the wood, FORESTO COLOR® panels exhibit colour differences. This variance can occur on the same side, between sides of the same board, as well as between different production batches.
